POSTDOCTORAL POSITION IN NANOMEDICINE

Wilhelm Lab, University of Oklahoma, Norman, OK

We are looking for a highly motivated **postdoctoral researcher** to join our team at the University of Oklahoma (OU) Stephenson School of Biomedical Engineering (SBME). Our research areas include the study of nanotechnology-biology interactions and nanomedicine applications.

Candidates are encouraged to pursue research in areas of personal interest within the context of nanomedicine. In addition, candidates will receive support for professional development and career advancement.

QUALIFICATIONS

The ideal candidate will have a **Ph.D.** in Cell Biology, Immunology, Biomedical Engineering, Biochemistry, or a related discipline. Preference will be given to applicants with experience in one (or more) of these areas:

- cell biology/vascular biology
- (cancer) immunology/immunoengineering
- microfluidics based tissue culture models

Candidates must demonstrate strong oral and written scientific communication skills and the willingness to advise graduate and undergraduate students. In addition, candidates are expected to contribute to grant proposal development.

APPLICATION PROCESS

Qualified applicants should email their application documents as a single PDF to Dr. Stefan Wilhelm (stefan.wilhelm@ou.edu). Requested application documents include:

1. Cover letter (brief descriptions of research experience, career goals/expectations, potential start date)
2. Curriculum vitae (including list of publications)
3. Research statement (including summary of research achievements and a proposal for upcoming research)
4. List of references (minimum of three referees with names and contact information)
5. Copies of two 1st author manuscripts (manuscripts must demonstrate relevant expertise)

Review of applications will continue until the position is filled.
